TRI-3271
Time Domain Relectometer (TDR) Cable Length Meter & Tone Generator

Description:
The Triplett TDR (time-domain reflectometer) is a digital cable tester that can determine cable length or distance to a break from one end. With a large library of 39 standard cable presets any installation becomes easy. The TDR can generate tone for ease of wire tracing with any inductive probe and is well suited for a variety of industrial and residential applications.

Features:
• Find Cable Length or Distance to Fault from one end
• Low Cost Digital Cable Length Meter/TDR
• Built-in Tone Generator for Cable Tracing & Identification
• Simple Operation with Automatic Distance Display
• Internal Library of 39 Standard Cable Types
• Suitable for testing all types of Communication Cables
• Determine cable inventory
• Find distance to cable breaks while cable is installed
